Once approved, defendant will be placed in a Transitional Work Program. "In lieu of revocation, the offender is ordered to complete up to 6 months in TWP."

Specialized Programs for Post Adjudication Incarceration

These programs require the court to **revoke the defendant's probation and/or sentence the defendant to DPS&C custody**. The court may recommend any of these programs for the defendant. DOC will place the defendant in appropriate programs based upon the classification process, which includes consideration of court recommendations. Upon program completion, the defendant must complete his or her period of incarceration and is not returned to probation supervision.

Any credit for time served while held in custody pretrial and eligibility for the application of good time laws will impact the amount of time an individual will serve in custody and therefore could have a negative impact on the individual's ability to participate in and successfully complete the recommended program.

Good Time Calculation Rate

The below **goodtime calculation examples are for illustrative purposes** only and are intended to serve as a guide that can be used to **estimate** the amount of time a person may be required to spend in the custody of the Department of Corrections pursuant to a particular sentence(s) and or revocation(s) before releasing via diminution of sentence/goodtime (if otherwise eligible for good time under statutes applicable at the time the offense was committed).

Official time calculations and release dates are completed by the Department of Corrections during the pre-classification intake process and upon receipt of all relevant sentencing documents including, but not limited to, the uniform commitment, pre-trial jail credit, and/or revocation history. This process also must factor in other applicable information such as previous convictions, concurrent or consecutive sentences, offender class etc. all of which may also impact time calculations. Furthermore, time calculations and release dates can be subsequently updated throughout inmate's incarceration as needed due to course completions, disciplinary loss of or restorations of goodtime, and or subsequent sentences.

Key Definitions:

1. **Goodtime:** eligible inmates custody of the department who has been convicted of a felony, may earn a diminution of sentence by good behavior and performance of work or self-improvement activities, or both, to be known as "good time". Earning rates are determined by statute. For offenses committed before August 1, 2024, see La. R.S. 15:571.3; for offenses committed on or after August 1, 2024, see La. R.S. 15:571.3.1.
2. **Certified Treatment Rehabilitative Programs "CTRP":** eligible inmates may earn additional credits towards the reduction of projected goodtime parole release date for completion of Certified Treatment Rehabilitation Courses such as education, job skills training, values development and faith-based initiatives, therapeutic programs, and treatment programs pursuant to La. R.S. 15:828(B).

General Goodtime Calculation Formula for Offenses:

IMPORTANT: Rule applicability depends on the DATE OF THE OFFENSE, not the date of sentencing. Offenses committed before August 1, 2024 use the legacy rates below (La. R.S. 15:571.3). Offenses committed on or after August 1, 2024 use the rates in La. R.S. 15:571.3.1, under which ordinary good time is capped at fifteen percent of the sentence imposed.

GOOD TIME RATES FOR OFFENSES COMMITTED PRIOR TO AUGUST 1, 2024

Nonviolent Offense Basic Sentence Computation

- $\{\text{Total Sentence Length}\} \times \{35\% \text{ Time-Served Rate}\} - \{\text{Jail Credit Days}\} - \{360 \text{ Days CTRP Credit}\} = \text{Projected Good Time Release Date}$

Example 1: 10-year sentence for drug possession with 1-year of jail credit and max CTRP credit

- 10 years x 35% - 1 year jail credit – 360 days CTRP credit = 1.5 years Projected Good Time Release Date

Violent Offense Basic Sentence Computation (Assumes 1st Offense)

- $\{\text{Total Sentence Length}\} \times \{75\% \text{ Time-Served Rate}\} - \{\text{Jail Credit Days}\} - \{360 \text{ Days CTRP Credit}\} = \text{Projected Good Time Release Date}$

Example 2: 10-year sentence for armed robbery with 1-year jail credit and max CTRP credit

- 10 years x 75% - 1 year jail credit – 360 days CTRP credit = 5.5 years Projected Good Time Release Date

Notes about Legacy Good Time Rates

- Ordinary goodtime earn/award rates are different for nonviolent and violent offenses etc.
- Assume all defendants will earn maximum amount of CTRP credit of 360 days.
- Calculation formula above accounts for goodtime awarded in conjunction with pretrial jail credit.
- Offender class is irrelevant when the offense is nonviolent.
- 2 or more violent offenses are **flat** with no good time
- Sex offenses and habitual offender sentences are **flat** with no ordinary good time
- Non sex habitual offenders may earn up to 360 CTRP
2026 update: under Acts 2026, No. 28 (effective August 1, 2026), La. R.S. 15:828(E) now allows eligible offender who earns an associate's degree (in addition to a bachelor's degree) from a regionally accredited, department-approved institution while incarcerated to earn an additional ninety days of credit toward reduction of the projected good time parole supervision date.

NEW GOOD TIME RATES FOR OFFENSES COMMITTED ON OR AFTER AUGUST 1, 2024 (2024 Special Crime Session)

Basic Sentence Computation

Note No distinction between violent and nonviolent crimes in terms of ordinary goodtime earn/award rates.*

- **{Total Sentence Length – Jail Credit} x {85% Time-Served Rate (maximum 15% ordinary good time)} – {360 Days CTRP Credit} = Projected Good Time Possible Release Date**

Example 1: 10-year sentence for drug possession with 1-year of jail credit and max CTRP credit

- {10 years - 1 year jail credit} x 85% – 360 days CTRP credit = 6.65 years Projected Good Time Release Date
 - *For reference, under new goodtime rates the same sentence for non-violent offense as illustrated in example on p.13 results in 5.15 years longer must serve rate than under previous rates.*

Example 2: 10-year sentence for armed robbery with 1-year jail credit and max CTRP credit

- {10 years - 1 year jail credit} x 85% – 360 days CTRP credit = 6.65 years Projected Good Time Release Date

Notes about New Good Time Rate

- No distinction between violent and nonviolent crimes in terms of ordinary goodtime earn/award rates.
- No additional good time on pre-trial jail credit/above calculation formula accounts for this change.
- Max amount of ordinary goodtime towards release date is 15%.
- Sex offenses and Habitual offender convictions are ***flat*** with no ordinary good time.
- For purposes of above formula, assume all defendants will earn maximum amount of CTRP credit of 360 days.
